## PROFILE

An enthusiastic and highly motivated person looking for an entry-level position in web and app development. With a passion for technology and a desire to learn, I am eager to contribute to a team and develop my skills in the field.

## ACHIEVEMENTS

### AIP SCHEDULING

University Project

- The AIP scheduling process was automated by developing an algorithm in **JavaScript** and designing a user-friendly interface in **React**.
- The data of AIP's is stored using **SQL Server 2019** as the backend database management system.

### TALKIES

Personal Project

- Talkies is a chat application built with **Flutter** and a **Firebase** database. Regardless of location, it enables users to connect and communicate in real time.
- Talkies make it simple for friends and family to communicate with each other thanks to its user-friendly interface and clear design.

### PROJECT TRACKER

University Project

- The application is a tool for keeping track of all the project's details and participants.
- The application features a user-friendly **React**-based interface, powered by **Express** for seamless connectivity, and a strong **MongoDB** database for effective project data storage and retrieval.

### EDUZU

University Project

- EDUZU uses **Flutter** to create a simple and appealing user interface, and the rich backend functionality of **Supabase** enhances its usability.
- This app will serve as a link between students and teachers thanks to its fantastic features and user-friendly design.
